• Mangaluru • Indian

SKILLS

Languages: Javascript,Python

Developer Tools: VS Code, Cursor AI, Git, GitHub

Technologies/Frameworks: ReactJS, NodeJS, ExpressJS, TailwindCSS

Database : Mongoddb , Sql.

SoftSkills : Problem-solving,teamwork, leadership,adaptability,communication,Project mangaments

Projects

Ayush-Veda

Web Application

- Built a responsive e-commerce web application using HTML, CSS, and JavaScript for showcasing Ayurveda products.
- Designed clean and structured product listings with categories for easy navigation.
- Implemented interactive features such as search functionality, navigation menus, and a shopping cart simulation using JavaScript.
- Focused on creating a user-friendly and responsive UI for smooth browsing across devices.
- Strengthened knowledge of core web development and gained practical experience in building real-world applications.

Deep Learning for Skin Lesion Detection

ML Project

- This project focuses on the detection and classification of skin lesions using deep learning, specifically through a Convolutional Neural Network (CNN).
- Dermatoscopic images are preprocessed by normalization, resizing, and augmentation to improve model performance and generalization.
- The CNN is trained on a labeled dataset to distinguish between benign and malignant skin lesions.
- Evaluation metrics such as accuracy, loss, and a confusion matrix are used to assess the model's predictive capability.
- Overall, the project aims to assist in early and accurate skin cancer detection using automated image analysis.
- **Tech Stack:** Python, TensorFlow/Keras, PyTorch, OpenCV, NumPy, Pandas, Matplotlib, Seaborn, Jupyter Notebook, Git & GitHub.

Currency Exchange

<https://crrency.netlify.app/>

- Provides real-time exchange rates for all major and minor world currencies, enabling seamless international currency conversion.
- Offers a developer-friendly API that can be easily integrated into financial applications, e-commerce platforms, and travel services.
- Fetches live data from reliable financial sources to ensure precise and up-to-date currency conversions anytime, anywhere.
- Tech Stack: HTML ,CSS ,Javascript ,Git & GitHub.

Education

WORK EXPERIENCE

Ultimez Technologies

Web development Intern

06/2025 - 07/2025

Developed an **AI-powered web application** for **real-time currency conversion** using live exchange rate APIs.
Designed and implemented a **dynamic, responsive, and user-friendly interface** to enhance overall user experience.
Collaborated with the team to build the frontend using **modern web technologies** like **HTML, CSS, JavaScript**, and frameworks as required.
Ensured **cross-browser compatibility** and **mobile responsiveness** for seamless usability across devices.
Integrated and optimized **API connections** to deliver accurate, up-to-date currency data with fast performance.
Focused on **UI/UX optimization** and **accessibility improvements** to create an efficient and engaging product.

Cognifyz Technologies

ML Intern

09/2025 - 10/2025

Assisted in developing and training **machine learning models** for solving **real-world problems**.
Utilized **Python libraries** such as **NumPy, Pandas, Scikit-learn**, and **Matplotlib** for data analysis and visualization.
Contributed to **data preprocessing, feature engineering**, and **model evaluation** to enhance model accuracy and performance.
Gained practical experience in the **end-to-end ML workflow**, from data handling to model optimization.
